

HR ONBOARDING GUIDE

IT Setup and Security Policy

1. Company Account

New employees receive a company email account during onboarding.

Employees must use their company account for official company communication.

2. Password Policy

Employees must create a strong password for their company account.

Passwords must not be shared with other employees.

Employees should not reuse their company password on personal websites or services.

3. Multi-Factor Authentication

Multi-factor authentication (MFA) must be enabled for the company account.

Employees should complete MFA setup during their initial IT setup.

4. Company Devices

Company-provided laptops and devices must be used responsibly.

Employees should not install unauthorized software on company devices.

5. IT Support

For IT setup problems, employees should contact the IT support team.

Employees should report security issues or suspicious activity to the IT support team immediately.
